

KARAN KAMAT

Data Engineer | Pune, Maharashtra | +91 7769863030 | karankamat2000@gmail.com | linkedin.com/in/karankamat2000/

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience building scalable data pipelines and ETL workflows. Optimized data processing (40% runtime reduction) using SQL, Apache Spark, and PySpark for high-volume transformations. Built real-time streaming workflows and automated data quality checks. Currently exploring Gen AI technologies including MCP and RAG to enhance data workflows with intelligent automation.

EXPERIENCE

JIO PLATFORMS LTD. – Navi Mumbai, Maharashtra

Data Engineer

Jul 2022 – Present

- **Data Pipeline & Performance Optimization:** Designed and implemented scalable data pipelines using Apache Spark and PySpark, processing over 1TB of data. Enhanced performance by 35–40% through ETL tuning and pipeline optimizations, ensuring high data integrity.
- **SQL Development:** Engineered efficient SQL queries for data extraction, transformation, and loading, reducing processing time from 10 to 4 minutes and improving query performance by 60%.
- **Streaming & Scheduling:** Streamed real-time data using Kafka (100K+ events/sec) and scheduled Spark batch jobs via Airflow, achieving 99.9% job success rate and reducing data latency by 30%.
- **Collaboration & Version Control:** Used Git for version control and code reviews in cross-functional teams, leading to a 20% improvement in code quality and a 15% boost in team efficiency.
- **Mentorship & Knowledge Sharing:** Guided junior team members by resolving technical issues and conducting knowledge transfer (KT) sessions, improving team productivity and reducing onboarding time by 20%.

YARDI SOFTWARE INDIA – Pune, Maharashtra

Software Engineering Intern

Jan 2022 – Jun 2022

- Boosted reporting efficiency by **25%** by automating report generation using in-house tools, reducing manual effort.
- Developed SQL scripts that resolved **95% of client issues on the first attempt**, cutting resolution time by **30%**.
- Created complex SQL queries for faster data retrieval, leading to a **25% reduction** in data processing time.

SKILLS

Programming Languages: SQL, Python

Big Data and Distributed Computing: Apache Spark, PySpark, Databricks, dbt (Exploratory)

Workflow Orchestration: Apache Airflow

Streaming Systems: Apache Kafka

Development Tools: Git, Pycharm, Vscode, Cursor

Cloud: AWS (S3, EC2)

GenAI (Exploratory): LLM Tool Calling, MCP, Langchain (Basics), RAG (Fundamentals)

PROJECTS

E-Commerce Data Lakehouse on Databricks

Personal Project | github.com/KaranKamat0506/ecommerce-data-lakehouse

Apr 2026 – May 2026

Tech: PySpark, Delta Lake, Databricks (Serverless), Spark SQL, Python, Unity Catalog

- Designed an end-to-end **Lakehouse** using **Medallion Architecture** (Bronze → Silver → Gold), processing **165K+ records** across **20+ Delta tables**.
- Built a **Kimball Star Schema** (fact_orders, dim_customers, dim_products, dim_date) with optimized **partitioning** and **Z-ORDER**, enabling **sub-second query performance**.
- Developed a reusable **data quality framework** (Python-based) with **6 validation rules**, scoring, **audit logging**, and **exception-based quarantine handling**.
- Implemented **CDC pipelines** using **SCD Type 1 & 2**, **MERGE operations**, and **watermarking** with **Delta Lake ACID transactions** and **schema evolution**.
- Delivered **business insights** via analytics queries (**RFM segmentation**, growth trends, cross-sell analysis) on a **serverless PySpark pipeline**.
- Leveraged **Delta Lake** features such as **ACID transactions** and **time travel** to support **data recovery**, backfills, and **audit requirements**.

Internal File Deployment Tracker - Jio Platforms Ltd., Navi Mumbai	
<i>Developer</i>	<i>Jul 2025 – Sep 2025</i>
<i>Tech: Python, Git, Azure DevOps REST API, JSON</i>	
- Devised an internal tool to identify and track files scheduled for migration to higher environments by capturing developer names and container IDs from Git commit history. - Integrated with Azure DevOps REST APIs to fetch commit and deployment metadata, operationalizing status tracking and improved visibility across teams. - Streamlined deployment clarity for release managers and reduced manual tracking effort by 80%. - Orchestrated extraction and processing using Python and Git integrations to streamline file-level deployment insights.	
EDUCATION	
MIT School of Engineering – Pune, Maharashtra	<i>Jul 2019 – Jun 2022</i>
B. Tech Computer Science and Engineering; Cumulative GPA: 7.82	
Cusrow Wadia Institute of Technology – Pune, Maharashtra	<i>Aug 2016 – May 2019</i>
Diploma in Computer Engineering; Percentage: 76.56%	
CERTIFICATIONS / COURSES	
AWS Skill Builder – Getting Started with Amazon Simple Storage Service (Amazon S3) Apr 2026
